

12-core optical cable kilometer color spectrum

Overview

The standard color sequence is based on a 12-fiber system, which repeats for cables with higher fiber counts. Color Code for 12 Fibers: Blue Orange Green Brown Slate (Gray) White Red Black Yellow Violet Rose (Pink) Aqua (Light Blue) Dimension 1. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles. Specifications are correct at time of. Prysmian uses the US industry standard repeating 12-color sequence. When cables go beyond 12 units, the colors repeat but use a stripe to distinguish units. The color code for fiber optic cables is regulated by the This color coding is important for identifying individual fibers within a multi-fiber cable and for maintaining consistency in fiber. ked with different colors and bar codes to facilitate identification. Hexatronic offers cables with color code systems according to all international and national standards and for all types of fiber optic such as a tube, ribbon, yarn wrapped bundle or other types of bundle.
