

19-inch 12u network rack

Overview

The wall-mountable swing frame is perfect for saving valuable floor space while organizing network and server equipment from telecom, surveillance and audio/video applications where space is at a premium and a full-size floor-standing rack or cabinet cannot be used. The 540 mm (21.26 in.) usable depth of the rack allows for the mounting of shelves. The open frame design ensures maximum airflow to your equipment for smoother operation and a longer lifespan. It also allows your cabling to enter through all sides. Hinges on the rear frame let the entire enclosure swing open for easy component exchange and maintenance. Three latches keep the frame closed. This construction makes it a smart choice. The strong and durable housing, constructed of high-quality SPCC cold-rolled steel with antistatic powder coating, carries a load capacity up to 40 kg (88 lbs.). Its fully assembled shipping condition saves you the trouble of putting it together. The enclosure also saves you the expense of 20 rack screws and cage nuts to securely mount your equipment.
