250A Primary Distribution Box at the Construction Site

Overview

Power distribution (without energy measurement) 250A built in the GPI-system. The distribution assembly is equipped with sockets 13-63A which are preceded by residual current. Mains Voltage Distribution Assemblies fitted with incomers up to 250A rating fitted with a variety of 230V and 400V sockets individually protected by MCB and RCCB. Built from galvanized sheet steel and rated to 250A, this medium sized unit is manufactured. Intelligently designed plastic housing with cross-divided inlet and outlet openings integrated within its bottom and cover facilitate in combination with the folding strain relief clamps effortless, time-saving connection of the distributors. Connection time is reduced by up to 50%. In the case of. The IP55 protection class is an important concept in connection with power distribution boards on construction sites.
