

A gigabit router connected to a 200Mbps fiber optic cable is not working

Overview

To fix this, go into device manager and uninstall the driver and reboot. This should force it to download the newest available from Microsoft, then you should manually update from there using your motherboard's latest network driver that you can get from their website. My ISP is pretty dumbfounded and can't figure out. Some customers may report the speed is limited to 100 Mbps when connected to the TP-Link router, while the speed is much faster and can reach up to 500+ or 900+ Mbps when connecting to the ISP modem directly. After that, change speed and. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
