

AI aimbot has its own server

Overview

AIMr maintains a dual-channel community infrastructure centered around a Discord server and GitHub repository. The Discord server functions as the primary hub for community interaction, technical support, paid version distribution, and comprehensive guides. An undetected, AI-driven aimbot built in Python. Works on any game with human-shaped models. Want the full experience?

The paid version — available exclusively in our Discord — includes significant upgrades across every category. AIMr leverages modern AI and computer vision technologies to deliver. Aimmy contains over 40+ unique ways to tune your aiming, ranging from tweaks to Aim Positioning, to full features like Anti-Recoil and Detection ESP. For comprehensive configuration options after installation, see Configuration. GitHub - xxreflextheone/AI-Aimbot: Open source AI powered aim assist written in Python for all* games. · GitHub Lunar LITE is built on top of the original Lunar project. Lunar V2 includes: Download Lunar V2 □ What Is an AI. Enhance your experience with our recoil script & AI-powered aimbot Cheat AI-powered aimbot for FORTNITE, R6, PUBG, APEX LEGENDS, MARVEL RIVALS, RUST, CS2, CALL OF DUTY.
