

AMD 4th Generation AI Server

Overview

Powered by AMD EPYC™ 9004 Series processors, this 4U high-density server is built for AI, HPC, and data-intensive workloads. 0 architecture and support for up to 10 full-height, full-length GPUs, it delivers exceptional compute performance and scalability. Whether you are looking to upgrade your data center, optimize the cloud, or accelerate with AI workloads, AMD EPYC Server CPUs can help you unlock high performance, energy efficiency, and lower TCO. Experience advanced performance and energy efficiency for enterprise workloads with seamless x86. Aivres AI systems powered by AMD Instinct™ GPU accelerators set new standards for exascale AI and HPC infrastructure in the data center. Ideal for AI training, deep. The 4th Gen AMD EPYC 9634, a server CPU from the 9004 Series, is crafted to fuel data centers with robust core setups and swift memory access. Designed to meet. Advanced Micro Devices Inc. (NASDAQ: AMD) is preparing to launch the next generation of its AI accelerators in the second half of 2026, introducing the Instinct MI450 alongside the Helios rack-scale platform (MI455X), both part of the MI400 series. The rollout marks the chipmaker's latest push to. AMD used its “Data Center and AI Technology Premiere” event to announce new products and share how the company will shape the next phase of data center innovation.
