

Black rubber sheet in front of the distribution box

Overview

Commonly used in front of switchboards, control panels, and distribution boards, this matting helps protect personnel from electric shock and ensures compliance with health and safety standards. Our Black Insulating Rubber Sheet is manufactured with superior quality rubber, designed to handle up to 10Kv of electrical insulation. Perfect for. One of the most frequently discussed safety topics is whether it is mandatory to lay insulating rubber mats in front of switchboards or distribution cabinets. Today, Jinneng Electric Power examines this topic from the perspective of regulations, standards, and best practices to provide clarity for. An electrical room rubber mat is a safety equipment. We first need to take a general view of personal protective equipment (PPE), and what we're required. PCE solid rubber distributor housings are made from a mixture of natural rubber, styrene and butadiene (NK/SBR). The raw material is processed - in slab form - at pressures of up to 400 t and at a temperature of 180°C.
