

Cable Tray Cover Machine Equipment

Overview

Cable tray manufacturing relies on a coordinated production line of specialized machines: a roll forming line shapes the profile, a CNC press brake handles secondary bending, a punch press creates mounting holes and ventilation slots, and a shearing line cuts the finished tray. Cable tray manufacturing relies on a coordinated production line of specialized machines: a roll forming line shapes the profile, a CNC press brake handles secondary bending, a punch press creates mounting holes and ventilation slots, and a shearing line cuts the finished tray. A Cable Tray Roll Forming Machine is a high-performance production line designed to manufacture metal cable trays used for supporting and organizing electrical cables in industrial and commercial buildings. It forms steel coils into perforated or solid cable trays with precise dimensions and strong. We are a high-tech enterprise specializing in the research and development, manufacturing, and sales of cable tray production equipment. It combines continuous rolling, online punching, cutting and forming functions in one, realizing a. HCM-600 Cable Tray Automatic Production Line is a cable tray roll forming line that adopts metal sheet coils as raw material. The whole cable tray production machine adopts. Cable tray making machines are used to manufacture cable trays – an important component in electrical installations and industrial buildings for routing cables and wires safely.
