

Cable connectors inside cable tray electrical boxes

Overview

Cable tray elbows, tees, crosses, and reducers are essential fittings used to maintain the proper routing and support of electrical cables within a tray system. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require precise routing. All illustrations, descriptions and technical information included in this document are provided as indications and can vary from actual products. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. The B-Line series Cable Tray Manual was produced by our technical staff. The following pages address the 2014 National Electrical Code® requirements for cable tray systems as well as design. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction. We have been successfully providing solutions through mastering our main and is a member of the US Green Building Council.
