

Cable tray marking color requirements

Overview

Cable trays containing conductors over 600 volts are required to be marked “Danger - High Voltage - Keep Away”. Depending on the specifications, the color is usually black print on white or yellow vinyl. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. Wire and cable labeling standards promote consistency, compliance, and efficiency in the management of electrical systems. Prominent standards, such as those established by ANSI, ISO, or NEC. association representing the major electrical equipment manufac-turers in the U. Markings on or associated with the product, the UL Listing, Classification, or Verification information, and requirements in the current edition of the National Electrical Code® all convey the information needed to ensure a compliant installation. Arc Flash Labels: Shall be present at switchboards, switchgear, panelboards, industrial control panels, meter socket enclosures, and MCC's and any other equipment that is likely to.
