

Cable tray with fixing points

Overview

Cable trays are produced in different heights and widths to give more choice for loading space availability. The cable trays feature slot patterns allowing for optimal and efficient positioning of equipment and easy access for cable ties and other fixings such as tubing. Establishing partnerships with customers is a top priority for OBO, and OBO staff are available to support customers in all aspects of their projects, including products, installation and planning advice. This is because we not only supply our customers with products and solutions, which. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. We also. maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray contains instrumentation and control applications that require. cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to silicone, overheating or. Regarding cable management, the fixing and mounting you choose for your cable trays can make or break your setup. Whether you're managing voice, data, or electrical cables, ensuring your trays are installed correctly is essential to keeping everything neat, secure, and functional.
