

Cable trays should be installed with conduits when passing through walls

Overview

13 Cables running through inaccessible areas such as walls, floors and solid ceilings shall be installed, without exception, in conduit or trunking so as to be withdrawable in the future. In such cases, suitable inspection plates and pulling out points must be provided. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports. The objective is to ensure safety, quality and compliance during the. en completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray.
