

# Can a fiber optic cable connect to multiple router layers

## Overview

To connect multiple Ethernet switches, the best way is to use a multi-strand fiber cable. The 4-strand pre-terminated fiber optic cable consists of four individual strands or fibers of glass or plastic fibers enclosed in a protective sheath. In the basement, there is the ONT+residential gateway device that converts the light impulses to Ethernet. This setup has to be changed because the house will be. Can a single optic fibre installation transmit multiple connections, For example, There are two networks, each network sends and receives data to or from. My question is can both the two networks be transmitted through a wired optic fibre?

Please correct me if am wrong I think you don't really. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other.
