

Congo FOB Fiber Optic Cold Splice 4-Core

Overview

The 4-core fiber termination box provides a stable, protective joint between optical cable and distribution pigtails at the end of fiber cables. It is typically used in cabling work area subsystems. Though we pay utmost attention, we cannot guarantee. FOST04A 4 Core Fiber Optic Splice Trays are used as an important accessory for fiber cable management items. Such as fiber optic terminal box, fiber optic splice closure, ftth terminal box, cabinet, etc. There are many possible ways to put two or more cables together or drop a single fiber at a location. Cold connection of optical fiber It is used to connect optical fiber or optical fiber butt pigtail, which is equivalent to making a joint (fiber butt pigtail refers to the butt joint of the fiber core of the optical fiber and the pigtail instead of the. 4 Port Fiber Termination Box is designed for FTTD (Fiber to the Desktop) system applications.
