

Core Switch S5720-28P Parameters

Overview

Huawei S5720-28P-SI-AC supports twenty-four Ethernet 10/100/1000 ports, four of which are dual-purpose 10/100/1000 or SFP, and 4 x Gig SFP. It offers double hot-swappable AC/DC power supplies, one AC power module is configured by default. Figure 1 shows the appearance of. Table 4-386 lists the mapping between the S5720-28P-SI-AC chassis and software versions. It is used with a console cable. The console cable is not delivered with the switch and needs to be separately purchased if. The S5720-SI series switches are standard Layer 3 Gigabit Ethernet switches that provide flexible full gigabit access and cost-effective fixed GE ports and 10GE uplink ports. The S5720-SI was developed based on next-generation high-performing hardware and the Huawei Versatile Routing Platform. The S5720-28P-PWR-LI-AC is a high-performance, managed Layer 2+ switch designed for enterprise networks, offering 28 ports with Power over Ethernet Plus (PoE+) support. Applicable modules: If a port uses a GPON optical module, other.
