

Croatian Intelligent Power Distribution Cabinet Model Parameters

Overview

Parameters under normal working environment Temperature and humidity
Temperature: -5°C ~ 40°C , humidity: 0-90% no condensation Elevation above sea level $\leq 2000\text{m}$; while exceeding 2000m, use for derating capacity Others Non-dustiness Occasion free of intense vibration and impact. Parameters under normal working environment Temperature and humidity Temperature: -5°C ~ 40°C , humidity: 0-90% no condensation Elevation above sea level $\leq 2000\text{m}$; while exceeding 2000m, use for derating capacity Others Non-dustiness Occasion free of intense vibration and impact. Overview: PLS-DP series of intelligent precision power distribution Cabinet series products include: power, UPS input, output, counter, three varieties of Cabinet. It is not just a distribution Cabinet, power inputs, outputs, power monitoring system as a whole set of integrated power distribution. With the optional SmartPack centralized management software, you can monitor your entire energy infrastructure professionally. The POWERGuard Intelligent PDU Product Family enables power distribution and monitoring for your data center cabinets. As a result, HEP ODS received an automation concept. An Intelligent Power Distribution Unit (iPDU), also known as a Smart PDU or Intelligent PDU, is a critical component in modern data center infrastructure.
