

Distribution Box Variable Frequency

Overview

We offer tailored voltage (380V/400V/480V) and frequency (50Hz/60Hz) to fit Asian, European and North American grids. Inlet/outlet modes (top/bottom/side), circuit counts (2-48) and internal components are fully customizable, matching motor, pump, elevator and lighting. Frequency (speed) adjustment :adjust the setting frequency and potentiometer on the front panel, It can easily and convenient to adjust the output frequency of the VFD manually. Meters display on the front door of the panel. install the voltmeter, Ammeter, frequency. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Wieland is your. Indication Lights: These provide visual availability and status of mains power supply. Each component plays a specific role. Together, they make sure the electrical power distribution box works well and safely. Smart DB boxes have extra parts like energy monitoring units and communication modules.
