

Electrical distribution box at the explosion site

Overview

Explosion-proof electrical equipment, such as explosion-proof distribution boxes, is specifically designed for hazardous environments where flammable gases, vapors, or dust may be present. Proper installation, wiring, and usage are critical to ensuring the safety and functionality of these systems. These sturdy solutions are certified according to global standards such as ATEX, IECEx. Seven workers vanished after a deafening blast tore through a California fireworks facility last July – a chilling reminder of why explosion-proof electrical equipment installation isn't just regulation, it's life insurance. Cable glands and conduit systems both do the job—sealing the enclosure, protecting the cable. Supermec ATEX Junction Box & Enclosures are designed to satisfy most of our clients' requirements for CONTROL explosion-proof and flameproof enclosures.
