

Electro-optical cable

Overview

Electro-optical cables make sense when copper alone can't handle your distance, data rate, or noise environment. With more than 80 years of experience in electro-optical cable. Precision engineered electro-optic cable assemblies from AmerCable Systems save you time and money! Premier cable design combining multi-core fiber optics and copper conductors in one common cable. Single mode and multi-mode fiber. Since its establishment in 1794 as a rope manufacturer, Rochester Cable has evolved into a recognized leader in the design and manufacture of electro-optical cables for a wide range of applications. Our cables are highly designed to meet specific application requirements in demanding industries. Mechanical, electro / optic / power / signal requirements inc. ICCP / CP, remote tooling applications with fibre and wire reinforcement layers. Selected for strength, cut protection and ballast or low weight. If you need an umbilical or cable and can't immediately see what you're looking for. This study presents the evolution of downhole fiber optics to a new hybrid electro-optical cable for coiled tubing (CT) applications. The electrical layer delivers.
