

Explosion-proof distribution box for electric heat tracing cable

Overview

This product is a specialized distribution box for electric heat tracing systems, particularly for freeze protection heating cables. A Hazardous Area is a location where combustible gases, liquids and other substances are stored, transported or processed. The eltherm organisation is officially certified by ATEX and IECEx. Versatile equipment manufactured by TEP Ex may be used for power connection, in-line and. Approved for installation in explosion hazard areas Junction boxes JB2221-544-2X (11-59) are designed for power distribution during installation, repair and upgrade of power cables and utility networks in explosion hazard areas. The box allows. BXM (Explosion Proof) Distribution Box is a standard distribution box for Heat Trace Cable b of electricity antifreeze, using a hanging or vertical box structure, power cable entry at the bottom of the box, IP54 protection Level, a variety of air circuit breakers are installed, with leakage. Product description: Heat Trace Cable Power Junction Box is used to connect power cables and electric heating cables. It can also be used in explosion-proof areas.
