

# Fiber Optic Cable Construction in Ghana

## Overview

Ghana approved a nationwide “Dig Once Policy” that mandates fiber-optic conduits and access chambers in all new road projects. Road and construction activities caused 60% of Ghana's fiber cuts, including 10,832 outages in 2023–24, costing 138 million cedis in 2024 alone. Telecom operators expect. Fibre optic internet uses thin strands of glass or plastic cables to transmit data using light signals instead of electricity. Because light travels faster and with less signal loss, fiber delivers: Unlike traditional copper cables, fiber does not easily lose signal strength. This makes it perfect. U-Ton Engineering Limited is a Ghanaian based engineering consortium and a fiber optics industry pioneer. U-Ton Engineering has about five years experience operating in the African telecommunications space and has engaged in an array of engineering activities mainly in Optical Fibre Networks;. Brilliant Constech is an Engineering Service Company that supports the Telecommunications industry within Ghana with products and services of the highest international standards partnering with renowned Telecommunication Operators and Civil firms in Ghana. Expert Specialized in Installation of. The Ghana Chamber of Telecommunications has raised concerns over a sharp rise in fibre optic cable cuts across the country, warning that the situation is threatening network stability and increasing operational costs for service providers. Chief Executive Officer of the Chamber, Sylvia.
