

# Fiber Optic Cable Number Identification

## Overview

The TIA-606-B standard sets the foundation for cable identification in fiber optic networks. Available in OS2/OM3/OM4 at factory-direct wholesale pricing. How to Identify Fibers in. Fiber optic color knowledge is crucial for anyone working in telecommunications, networking, or data management. Yet, correctly identifying and sorting these cables is paramount in. The Telecommunications Industry Association's TIA-598-C Optical Fiber Cable Color Coding is an American National Standard that provides all necessary information for color-coding optical fiber cables in a uniform manner. It defines identification schemes for fibers, buffered fibers, fiber units. The color code used for fiber optics is similar to copper, except for the addition of two colors: Rose (11 th) and Aqua (12 th).
