

# Fiber Optic Fusion Splicer Selection Guide

## Overview

A fusion splicer is the most expensive tool in a fiber technician's kit. Choosing the right one means understanding splice loss specs, alignment methods, battery capacity, and field serviceability -- and knowing which features actually matter for the type of work you do. This will typically be 250 $\mu$ m for bare fibers and 900 $\mu$ m for coated fibers. These are widely used in repairs, maintenance, or installations with low fiber counts. Ribbon Fiber Splicers, however, take efficiency to another level by fusing multiple fibers (up to 12). What Is a Fiber Optic Fusion Splicer?

A fusion splicer is a device that permanently joins two optical fibers by melting them together using an electric arc. Cladding. In Japan, we hold Fiber optic training where participants can systematically acquire knowledge and skills necessary for using fusion splicer, tools, and performing splicing work.
