

Fiber Optic Sensor FF-403

Overview

Sensor360 provides professional information on the FF-403 AMPLIFIER photoelectric sensors & switches for F&C, covering its features, applications, and specifications. Learn about the pricing, inventory, datasheet PDF, and equivalent parts for the FF-403 AMPLIFIER. About 5ms, 50ms, 500ms, 5S and no delay output. The five kinds of delay can be set by pressing the key F&C Sensing Technology (Hunan)Co.,Ltd is specialized in the R&D. Compatible Digital Fibre Amplifier FF-403: Why Choose F&C sensor?

(1) 23+ years manufacture and 10+ years OEM service sensor experience. Most delivery within 1 days (Stocks) Our Services 1. The warranty period is 18 months. If we send the wrong parts to you, free. FF-403 is a High Speed 12V DC Digital Position Fiber optic Sensors. It is very suitable for narrow space position detection when match with optical fibers F&C is the first factory which start to make Fiber Unit for Fiber Amplifier in. 1□ four-digit dual digital display fiber optic amplifier ;2□ automatic teaching setting □ delay mode ;3□ normally closed regulation □ delay output ;4□ strong anti-interference ability ;5□ digital Display □ easy to use. 6□ adopts red tail cover protective structure, uniform standard soft cord. Fiber amplifier-FF-403 series □ digital display, simple designed type□□ Better price, high sensitivity. 5ms/50ms/500ms/5s/0s, five choice of setting by button. 100% / 50% / 25% / 12% Transmitter power can. 1. Adjustable Response Time: With adjustable response time settings, the FF-403 sensor can be customized.
