But finding the break in a cable can be like searching for a needle in a haystack – it's a daunting task that requires patience, persistence, and. Fiber optic cables are typically damaged in one of two ways: A premade fiber optic cable suffers connector damage when too much pull-force is applied during installation. This can occur on long cable runs through tight conduit or duct, and also if the cable becomes caught or snagged. If your network goes down because of a break in a fiber cable or a defect in the thousands of feet of fiber that comprise most campus installations, certain tools are necessary to pinpoint the.
