

Fireproof sealing of wall-mounted distribution box

Overview

Firestop putty pads, firestop box inserts, firestop cover plate gaskets and endothermic mats are products that are often chosen for recessed box protection, but many times the application range and specific code requirements are misunderstood. Other recessed boxes installed in fire rated walls can include washing machine connections, dryer exhaust recesses, ice maker connections, and medical gas connection boxes. The International Building Code, which is adopted in most US jurisdictions, requires that all recessed fixtures be installed. ABB offers an innovative enclosure system for fire prevention, which is constructed of fireproof materials, features optimum technology and is available in a variety of economical designs. Membrane penetrations help protect electrical boxes in fire-resistance rated wall assemblies and are an essential part of fire safety to maintain model code required fire. Henkel's polyurethane or silicone sealing foams protect the electronics in control cabinets and electrical distribution boxes against external influences, such as moisture and dust, which can cause against corrosion and contamination.
