

# Fit cable stuck and can't be pulled out

## Overview

Once the flap is in the unlocked position, use tweezers or your fingers to gently pull the cable out of its socket. If the cable has a pull tab, use it to grip the cable. This simple method shows you the correct way to loosen and remove a stuck cable fast. For the future this often works and doesn't need a lot of brute force: If the plastic clip has 'stuck' or lost its springiness so. Knowing how to unscrew a tight cable cord without pliers is therefore a valuable skill, offering a practical solution to a frequent problem. The frustration of a stuck cable cord is. Strange women lying in data centers removing USB cables is no basis for a system of government. If its connected to something else, it could be easier to use compressed air?

Uncompressing air. Modern electronics contain a dizzying array of internal data and power cable connectors—and nothing brings a project crashing to a halt like accidentally breaking a connector.
