

# Funing Trough-type Cable Tray

## Overview

A Trough Cable Tray looks like a continuous “U” shape. It has a solid bottom and two side walls. This helps with cable ventilation to manage heat. Tracey Concrete offers a robust and practical range of precast concrete cable troughs, built to protect vital services in modern infrastructure. Cables and utilities installed within. The trough type cable tray represents a fundamental infrastructure component designed to support and organize electrical cables in commercial, industrial, and residential installations. This robust cable management system features a continuous bottom surface with raised sides, creating a protective. Cable Tray Supports: These include trapeze hangers, center-span supports, and wall brackets that anchor the entire system to the building structure (ceiling, wall, or floor). It's the ultimate protection for your cables.
