

Global Fiber Optic Cable Routes

Overview

This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status and infrastructure updates. Use the controls at the top to play the animation or step through year by year. Show me range to terrestrial fiber nodes on the map?

Is the ITU building in Geneva Switzerland within 10 km of a fibre node?

Start measuring on the map to see calculations here. " Physical glass cables on the ocean floor carry the bulk of intercontinental traffic—which is why chokepoints and cable cuts can slow (or sometimes partially disrupt) entire regions. The cable is operated by Global Cloud Xchange, a former subsidiary of RCOM. Fiber maps are visual representations of fiber-optic infrastructure—showing where fiber routes exist, how networks connect, and which locations are served. Cables shown on include international submarine cables with a maximum.
