

Gyta Optical Cable Fittings Customization

Overview

Customization: Core count, jacket printing, color, diameter, reel length; OEM/ODM branding available. Supply Capability: Stock of common models, fast-track production, split. Our outdoor optical cables are designed for aerial, direct burial, duct, and building span applications, delivering high performance and durability in harsh environments. The product range includes ADSS, GYTA/GYTS loose tube stranded types, GYTA33 heavy armored, and Figure-8 self-supporting. The double-sided corrugated steel tape (PSP) enhances the cable's moisture resistance, and the corrugated part combines better with PE, making the structure more robust. Designed for long-distance, high-capacity transmission in telecom backbone networks, metropolitan area networks (MAN), FTTx, and industrial communication systems. Reliable in harsh outdoor. Contact the supplier about freight and estimated delivery time. Every payment you make on Made-in-China. Claim a refund if your order doesn't ship, is missing, or arrives with product issues. The center of the cable core is a metal reinforced core. Copyright © 2023 SIHONG WEICHUANG OPTICS CO.
