

Heating Cable Distribution Box

Overview

The distribution box, as the "control core" of the electric heating cable system, enables zoned temperature control and data recording, providing early warning of freezing and blockage risks, and ensuring stable heating of long-distance pipelines. Electric heating systems are widely used in various industrial and civil scenarios. This article will. ENVIRON Surface-mounted distribution box for heating circuit distributors – Flexible, robust and ready to use The ENVIRON surface-mounted distribution box is the ideal solution for your underfloor heating – both in new buildings and in renovation. The. Temperature maintenance or freeze protection of pipelines and vessels in non-hazardous areas The junction box for series resistance heating cable SNF is designed for the purpose of connection of heating cables to power network.
