

# Home Fiber Optic Soft Router

## Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. I worked with the Cybernews. This guide will walk you through everything you need to know, from decoding tech specs to matching features to your lifestyle, so you can confidently choose the perfect fiber optic router for home and unleash the full potential of your internet. Contact Us Your Router Must Match Your Fiber Speed:. 125M consumers helped this year.
