

Honduras Fiber Optic Communication

Overview

Honduras is among the poorest countries in Central America and has long been plagued by an unstable political framework which has rendered telecom sector reform difficult; this has created real difficulties for telcos as well as consumers; fixed-line teledensity, at only 4.9%, is. Key Insight: Honduras has seen significant growth in fiber optic infrastructure, reaching 45% coverage by 2026. 9%, is significantly. Telecommunication in Honduras started in 1876 when the first telegraph was introduced, continued development with the telephone in 1891, radio in 1928, television in 1959, the Internet in the early 1990s, and cellphones in 1996. However, the compound annual growth rate (CAGR) for the period 2020-2024 stood at a healthy 7. This fluctuation could be attributed to shifts in demand or changes. Multidata has interconnected the whole country to the submarine cables Arcos and Maya 1, through its SDH network, and at the same time to its internet backbone at an actual speed of 465Mbps (3 STM-1), this makes us the internet provider with the greater bandwidth connected to the world's internet.
