

How many core switches has Huawei shipped

Overview

The series includes Huawei's flagship CloudEngine16800/12800 core switches, CloudEngine 8800 100GE core/aggregation switches, CloudEngine 6800/5800 high-performance TOR switches for 10GE/GE access, and CloudEngine 1800V virtual switches. With multiple industry-leading intellectual properties and patents, Huawei provides more than a hundred switch models in more than 10 series, including access, aggregation, and core switching. These switches accommodate cloud data center, large metro core, aggregation, edge aggregation, and access. Recent research shows that the network switches from Huawei once again won first place in the Chinese enterprise network switch market for the year 2022. Large enterprises represented by the Internet industry urgently need networks to meet high requirements such as large. CloudEngine S12700H series switches are Huawei's next-generation modular core/aggregation switches designed for high-end campus networks in the all-wireless era of Wi-Fi 6/7. CloudEngine S12700H series switches come in two models, which offer four and eight LPU slots, respectively.
