

How much does 48-core fiber optic cable cost per kilometer

Overview

A practical frame is \$40,000–\$350,000 per km, with a common mid-range around \$120,000–\$180,000 per km for standard single-mode fibre in ducted runs. Per-unit considerations include \$/km for total project, \$/duct meter for ducting work, and \$/splice for termination. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. 50 per meter, depending on several variables. Custom-built cables or niche specifications can lead to higher prices. Fiber Count and. The cost of fiber optic cable per kilometer can vary significantly based on a variety of factors, including the type of fiber optic cable, the geographical region, the installation environment, and the specific requirements of the project.
