

How much does OPG fiber optic splicing cost

Overview

For most commercial projects, expect to pay \$50-\$150 per fusion splice point - but that number can swing in either direction based on the factors below. Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site conditions. The "per splice" rate is the most. I usually bill T&M, but it works out to about \$175-250 for setup/teardown per site and \$4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it's flooded or dry cable. Add another \$50-75 to prep a new case endspan or \$100-150 for a new case midspan with overcut on. Fusion Splicer: This is the primary tool for fusion splicing, and its cost can range from \$3,000 to \$15,000 or more, depending on the model and features. High-end models offer advanced features such as automatic alignment and real-time splice loss estimation.
