

How much does a Palestinian PLC optical splitter cost

Overview

Modern PLC splitters typically range from \$20 to \$200, with pricing primarily influenced by the splitting ratio (1:2, 1:4, 1:8, 1:16, 1:32, or 1:64), insertion loss specifications, and manufacturing quality. Q2: Can I use a PLC Splitter outdoors?

Yes, but you must use a waterproof PLC Splitter with an IP-rated enclosure to ensure. PLC splitter, also called Planar Waveguide Circuit splitter, is a device used to divide one or two light beams into multiple light beams uniformly or combine multiple light beams to one or two light beams. They provide a low failure rate and a evenly spread splitting profile over the whole wavelength range from 1260nm to 1650nm. The technology employs planar lightwave circuit technology, ensuring consistent performance. Moreover, PLC splitters are cost-effective solutions for expanding network capacity, as they reduce the need for additional fiber lines. As the demand for high-speed internet and.
