

Huijue s Layer 2 Access Switch

Overview

Huawei's Layer 2 switches deliver advanced Ethernet switching capabilities, including high-speed frame forwarding, VLAN segmentation for network isolation, link aggregation (LACP) for bandwidth optimization, and port mirroring for traffic monitoring and security analysis. Featuring Ruijie's highest density 400G data center core switch, our solution utilizes 25/56G SerDes technology evolving to 112G SerDes, facilitating the seamless transition from 400G to 800G and beyond. X supports VSU, allowing up to 8 devices (recommended 4) to operate as a single virtual switch — unified CLI, IP, and seamless failover within 50-200 ms. Up to 40% energy savings and 802.3az EEE, intelligent fan speed, and PoE idle-port shutdown reduce noise and OPEX. Access switches are designed for cost-effectiveness and ease of use and provide the following features:

- High port diversity : Access switches offer a range of port types, such as 10/100/1000BASE-T ports, to accommodate the diverse access needs of various devices.
