

# Iceland Solution Fiber Ethernet Switch 100G

## Overview

FS 100 Gigabit data centre switches with build-in Broadcom switch chip provides powerful hardware switching capacity and data centre features (supporting stacking, MLAG, PFC, ECN, VxLAN, EVPN, REUP, etc), making them ideal for cloud data centre and high-end campus network. Using PicOS® and AmpCon™ to make network scalability and efficiency, reducing costs and enhancing security. Try professional and convenient services of FS. COM to push your. This category offers switches of various designs with a maximum data rate of up to 100G. The fiber optic ports are designed as SFP slots, therefore you can connect to any fiber type or different wavelengths by choosing a suitable SFP module. Arista delivers the most efficient, reliable and high performance Universal Cloud Network architectures based on 10G, 25G, 40G, 50G, 100G and 400G platforms delivered with. NADDOD's 100G data center switch is a powerful networking solution that provides high-speed connectivity for modern data centers. These switches deliver speeds of up to 100Gbps, making them ideal for high-demand applications such as big data analytics, cloud computing, and high-performance. FS 100G Switches offer high programmability and scalability, designed for large enterprises and hyper-converged infrastructure (HCI) networks.
