

Install a Vega Spectrometer

Overview

The adjustment software PACTware enables standardised adjustment of all VEGA sensors. After installation of the software on a laptop or PC, it can be connected to the sensor via a USB cable or a Bluetooth adapter. You can find detailed information about the area of application in chapter "Product description". Operational reliability is ensured only if the instrument is properly used according to the specifications in this document as well as. First question Can you use 22 guage wire or does it need to be 18 guage. the length is about 150 to 175 feet. The second question is does the unit vegaplus6x require a two conductor for power and a two conductor for 4/20 signal for output for remote screen The VEGAPULS 6X uses a two-wire 4. 20. This instruction provides all the information you need for mounting, connection and setup as well as important instructions for mainte-nance, fault rectification, safety and the exchange of parts. Select your product in the left selection list to obtain associated documents and software.
