

Installing the Optical Network Unit ONU Integrated Device

Overview

To configure the ONU easily, it must first be connected to the OLT. The detailed connection process is as follows: Hardware Equipment OLT Device: OLT3610-08GP4S ONU Device: TA1910-4GVC-W PLC Splitter RJ45 Network Cable, Console Cable Software and Tools Emulation Software: F201D belongs to the remote optical access unit (ONU) product series. It is referred to ONU in the following description. This device is an indoor device and cannot be used outdoors. What are OLT and ONU?

The Optical Line Terminal (OLT) manages and schedules downstream and upstream data transmission, provides user access, allocates bandwidth, and handles network management functions. As a. In today's fast-growing broadband industry, fiber optic OLT (Optical Line Terminal) and ONU (Optical Network Unit) play a decisive role in providing reliable, high-speed internet services.
