

Intelligent Customization Process for MTP Adapter Modules for Campus Network Use

Overview

Klaus Lechtenbörger from EPLAN shows how P&ID flow diagrams can be created efficiently in the MTP tool chain and exported as MTP. Laurids Beckhoff guides you through the process of module definition and development along with automatic PLC and human-machine interface. Module Type Package (MTP) is a formal description of the interfaces and functions of the automation technology of a modular process unit. MTP is standardized in the VDI/VDE/NAMUR 2658 directive and enables manufacturer-independent integration of process units into a higher process control level. This makes MTP a crucial component in the development of future modular automation solutions. Beckhoff has integrated the. The MTP DESIGNER is a module engineering tool that enables the easy and time-saving realization of modules in a processing plant. With its MTP solutions, WAGO can help you take advantage of these opportunities and make your processes, or those of your customers, flexible and adaptable. Guidelines for Maintaining Polarity.
