

LGBC4 type optical cable

Overview

● LC to LC or SC to SC ● Single-mode /multimode for option ● OM3 for multimode ● Optical Fiber 4 Cores Inside ● Compatible with all standard fibre optic equipment and connectors ● Stainless Steel sheathed and metal braiding strengthened ● Ceramic ferrule ensure low signal loss ● LC to LC or SC to SC ● Single-mode /multimode for option ● OM3 for multimode ● Optical Fiber 4 Cores Inside ● Compatible with all standard fibre optic equipment and connectors ● Stainless Steel sheathed and metal braiding strengthened ● Ceramic ferrule ensure low signal loss ● LC to LC or SC to SC ● Single-mode /multimode for option ● OM3 for multimode ● Optical Fiber 4 Cores Inside ● Compatible with all standard fibre optic equipment and connectors ● Stainless Steel sheathed and metal braiding strengthened ● Ceramic ferrule ensure low signal loss

□Cable reel order. OM4 multimode fiber optic cables have a core diameter of 50 microns, which allows them to transmit data over distances of up to 550 meters at a speed of 40 gigabits per second (Gbps), and up to 150 meters at 100 gigabits per second (Gbps). The OM4 designation refers to the cable's optical. The riser rated (OFNR) LGBC product family covering 2-72 fiber counts has undergone a design change. New jacketing, subunit and tight buffer materials have been implemented; fiber/subunit stranding has been modified; and a barrier tape has been added to subunitized cables with 24 fibers or more. Fiber Optic Cable, Outdoor Micro Cable for Air-blown installation, Central Tube All-Dielectric Fiber Optic Cable, Outdoor Micro Cable for Air-blown installation, Stranded Loose Tube All-Dielectric Fiber Optic Cable, Indoor/outdoor Low Smoke Zero Halogen, Central Tube Armored Fiber Optic Cable. Understand how to choose fiber optic cable by comparing single-mode vs. multimode, network speed and distance needs, cable jackets/fire ratings, connectors, cost and future-proofing for data and telecom networks. Fiber optic technology offers several key benefits including higher bandwidth for data. Indoor/Outdoor fiber optic cables are flame-retardant (FR) cables that are designed to meet both the rigorous...
