

Latest News on Huawei Optical Modules in 2024

Overview

Huawei released three new optical solutions at MWC 2024, including OSN 9800 K36, a DC-oriented OTN platform. 6T line cards, adding up to more than 100Tbps of capacity per chassis. China Mobile is already deploying it using 2x400G line cards with QPSK. [Paris, France, November 14, 2024] During HUAWEI CONNECT 2024 Paris, Huawei Global Optical Summit was successfully held in Paris, France. Themed "Accelerate F5G-A, Amplify Intelligence", the summit attracted more than 200 industry experts, customers, and partners from many countries around the. ZTE disclosed its first 800G pluggable CFP2 transceivers, which will be in production shortly (Q2 2024). The modules are designed to support a transmission distance of 2,000km over standard G652 fiber at 800G and can reach longer distances in 400G per wavelength mode. This award is intended to recognize the device vendor that provides the most innovative solution and has. Evolving towards the 2030 optical communications network system and architecture is a key issue facing the optical communications industry and requires viable technical options for building future-oriented and novel optical communications network systems. Optical networks form infrastructure that. PARIS, Nov. Innolight topped the most recent list in 2024, with Eoptolink in third and Huawei Technologies, Accenlink, Hisense and HG Genuine all making the cut.
