

Latest news on optical fiber cable pricing list

Overview

China's benchmark fiber optic price has surged over 400% since May 2025, hitting a new all-time high. CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. The price rally has expanded to Europe and the US, with prices for some fiber types rising over 130%. Strong demand from data centers is now the primary driver, replacing the previously dominant. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. Higher fiber counts allow for greater data transmission capacity, which can significantly increase the cable's price.
