

Lightning Protection Assembly Standards for Level 3 Distribution Boxes

Overview

BS EN IEC 62305-3 defines three accepted methods: air terminals (Franklin rods), meshed conductors, and catenary wires. Furse is the market leading lightning protection brand from Thomas & Betts, providing solutions worldwide for structural lightning protection, power earthing and electronic systems protection. At Thomas & Betts, our focus is on improving your business performance by providing practical, reliable. ECalPro's lightning calculator implements all three methods with automatic validation of which methods are applicable for the entered structure geometry. Both. actiVsense, BLITZDUCTOR, Blitzfibel, BLITZPLANER, CUI, DEHN, DEHN logo, DEHNARRESTER, DEHNBloc, DEHNbridge, DEHNfix, DEHNgrip, DEHNguard, DEHNport, DEHNQUICK, DEHNrapid, DEHN schützt., DEHNshield, DEHNSnap, DEHNventil, HVI, LifeCheck, Red/Line, “. The IEC technical committee is comprised of representatives from. The IEC 62305 (published by the International Electrotechnical Commission) defines the principles, methods, and requirements for the protection of structures and people against the direct and indirect effects of lightning.
