

Lightning protection measures for indoor distribution boxes

Overview

This Recommendation provides guidance on protecting indoor distribution systems for mobile communication in large-scale buildings from lightning and safety risks. It emphasizes compliance with standards like IEC 62305-3, IEC 62305-4, IEC 60364 series, and ITU-T K. It. Trees, buildings, fences. The matched, safe and tested lightning protection systems from OBO Bettermann protect people, buildings and property. OBO can offer the right selection of products, depending on the application and scope of protection. The neutrals are typically grounded at equipment locations. At Thomas & Betts, our focus is on improving your business performance by providing practical, reliable. To reduce the damage caused by lightning strikes, the surge protector in the distribution box plays an important role.
