

MPO adapter module with low temperature resistance

Overview

Engineered for data centers, telecom infrastructure, and industrial automation systems, this adapter features UL94-V0 flame resistance, RoHS 2.0 compliance, and robust performance across extreme temperatures (-40°C to +85°C). Designed to unleash high-speed data center capabilities, MPO Cable Assemblies and Adapters use high-density MTP and MPO-style connectors to deliver streamlined connectivity, high port density, superior loss performance and simplified maintenance for the high-bandwidth networks of tomorrow. This Hybrid Adapter serves as the ideal choice for. That is why Amphenol developed the 955 series MPO adapter family. High-density adapters engineered for MPO/MTP® fiber systems, ensuring precision alignment, reliable performance, and space-saving. An MPO adapter (also called an MPO coupler) is a passive fiber optic component used to connect two MPO connectors together. This ensures a stable and accurate connection, allowing optical signals to pass between them with low loss. Novobit assembles both Senko MPO (Plus and Premium) and USConec MTP (Standard and Elite) connectors. MTP is an improved version of MPO with better strain relief and temperature stability.
