

Make several right angles in the cable tray

Overview

You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make one using a metal bar. Also, is it possible to place a new cable trays inverted in such a way that the bottom of the cable tray is upside?

I welcome any ideas or suggestions. Elbow joint RVS is pushed inside the cable tray and attached with the included screw set. Elbow joint RVS can be used to change a cable tray's horizontal orientation with a range of -90° – $+90^{\circ}$. Need more information?

The point A is the first angle. I don't know if that will change the math much?

I was hoping for something simple like the rise over run thing. Something that I could do on site quickly. The range for adjustable corner piece SRS is $0-75^{\circ}$. Do you want a hard 90 or 2 spaced out 45° bends?

Need dimension of tray first width x side wall. Oglaend System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping.
