

Malawi fiber optic cable cut

Overview

Multiple subsea fiber optic cables in the Red Sea suffered simultaneous cuts on September 6, 2025, disrupting global internet and communications traffic. The incident began at 05:45 UTC and has forced operators to reroute traffic between Asia, the Middle East, and Europe over. I've been seeing a troubling pattern lately around Blantyre city: cut and damaged fiber optic cables. As someone who cares about Malawi's digital growth, this worries me deeply. Disrupted. LILONGWE- (MaraviPost)- The country's leading mobile telecommunications network Airtel Malawi Plc today addressed the growing challenge of fiber infrastructure vandalism, which continues to disrupt essential communication services across the country. The call comes barely months after the company. The Optic Fibre Communications (OFC) is a semi-autonomous department within ESCOM that operates a national wide overhead Optic Fibre backbone network strung on electricity infrastructure reaching all parts of the country and the National Data Centre supported by the Malawi Government. This gives. Following a spate of fibre cuts that disrupted voice and data services, Airtel Malawi has announced plans to acquire the additional capacity for its international data links and partner with more local fibre providers to enhance network reliability.
